

## TBM Professional of the Year Award

---

### Category Description

This award honors a standout TBM professional and advocate who has significantly advanced the visibility, adoption, and impact of TBM throughout their organization and the industry at large. The nominee has played a pivotal role in driving TBM success by championing TBM principles, mentoring peers, and contributing impactful thought leadership that elevates TBM both internally and across the broader industry.

This award recognizes individual excellence rather than organizational success and is open to TBM professionals from any industry. Employees of the following organizations are not eligible to apply for an award: IBM, TBM Council, any TBM software or service provider, any partner or sponsor of TBM Council or TBM Conference.

Nominees may self-nominate or be nominated by a colleague, peer, or industry leader. The judging process will consider the nominee's specific contributions to TBM over the past year; a nominating statement describing their impact; and their engagement in the TBM community, including participation in TBM Connect, publications, and knowledge-sharing activities.
